PROFILE

Analyst with retail and energy experience, supported by an MSc Business Analytics from Warwick Business School. Works across customer behaviour, commercial forecasting, performance reporting and operational analysis using Power BI, SQL, Excel, Python, R and SAP S/4HANA. Combines business context with clear analysis and practical recommendations.

PROFESSIONAL EXPERIENCE

Team Leader | Co-op Retail | Greater London

April 2025 - Present | Analytical focus: retail performance and operations

- Analyse Co-op Power BI reports and Excel across £50k+ weekly turnover, 1,000+ SKUs and 10+ KPIs, comparing sales, transactions, availability, online performance and waste with targets and prior-year results.
- Investigate trading and category performance, identify operational gaps and present findings and priority actions to store and area management.
- Use historical sales, seasonal demand and stock information to support ordering, replenishment and merchandising priorities; review customer complaints and recurring service issues with the store team.

Assistant Manager - Marketing | Torrent Gas Pvt. Ltd. | Pune, India

September 2021 - May 2023 | Analytical focus: customer and commercial performance

- Developed domestic customer-acquisition forecasts using SAP S/4HANA customer data, occupancy, household density and historical trends in Excel. Reported forecast accuracy improved by approximately 30%, supporting expansion planning and around 2,700 new domestic acquisitions.
- Analysed CRM, billing, consumption and payment behaviour to inform customer actions, contributing to approximately 15% improvement in retention and 15% reduction in overdue accounts.
- Standardised recurring customer and commercial KPI reporting using SAP exports, Excel, Power Query and PivotTables, reducing reported manual reporting effort by approximately 40%.
- Evaluated CNG expansion using demand, vehicle movement, customer potential and competition, supporting 24 finalised stations and contributing to a reported 13% increase in CNG net sales.
- Validated and migrated 1,100+ customer records into SAP S/4HANA using Excel reconciliation and data-quality checks, coordinating corrections across teams.

Customer Advisor - Christmas | Boots | Stratford

October 2024 - January 2025

Frontline customer service in a busy retail environment, building practical understanding of customer needs, product questions and the shopping experience.

Selected analytical work and education

SELECTED ANALYTICAL PROJECTS

Co-op Retail Performance Intelligence | Portfolio project

Power BI, DAX, Python and Pandas

- Prepared and compared retail data across six stores and eight categories, with three Power BI pages covering executive, store and customer/member views.
- Analysed the checked-in dataset of 4,981 cleaned rows. Members account for 54.9% of recorded revenue; £9.91 is revenue per unit, not basket value. Portfolio data is separate from Co-op employment reporting; original provenance remains unconfirmed.

[View repository](#)

Customer Review Intelligence | Portfolio project

Python, NLP, DistilBERT, T5, Sentence Transformers and ChromaDB

- Combined product information and review text in an exploratory product-query workflow. The current files contain 245 reviews across 49 reviewed products and a 50-product catalogue.
- Implemented text preparation, sentiment exploration and product-ID queries, with separate chunking and embedding experiments. Retrieval integration and answer-quality evaluation remain next steps.

[View repository](#)

Loan Default Risk | Academic project

Python, TensorFlow, SMOTEENN and scikit-learn

- Developed a regularised neural-network classification workflow with training-only resampling, explaining why missed defaults and false positives need different business consideration.
- Repository-reported results: 97.25% recall, 69.66% precision and 93.10% accuracy. These are experimental metrics; decision-time feature checks and temporal validation are required before operational use.
